Rally Championship

## Championship Bulletin No1-2019

### Use of Short and Long Links on Ford Escort MK 1

A number of crews have been asking about the use of Long Links on Ford Escort MK1 vehicles.

After consultation with Motorsport UK at present there has been no approval to allow the fitting of long rear suspension links on MK 1 Escorts other than 1975 cars which would be a Category 3 car.

Any MK1 escort currently fitted with long rear suspension links MUST return there HVIFs to the technical department of Motorsport UK with any evidence of period use to allow them to be used on a Category 2 vehicle.

If proof cannot be provided to Motorsport UK for Category 2, then they will have to be changed back to Short links and have the long link boxes fitted removed, otherwise the vehicle will have to move to a Category 3 class.

Regards

Colin Heppenstall
